TAUPLE

A blockchain as a service platform

Overview

- Tauple provides blockchain solution for enterprises to develop, deploy and scale blockchain applications while saving both time and money.
- With Tauple we bring together different blockchain networks, consensus protocols, scalability methods, smart contract engine and other DLT technologies together.
- Modern PAAS tools to make it easy for enterprises to create friction-less application on top of their legacy systems.

Team

Tejinder Singh Mor
Blockchain Researcher
Draper U, ex FuelScale

Madhav Verma
Go & C++ developer
ex Samsung

Alok Ranjan
Full Stack developer
Thiel Fellow Finalist

We deliver

Plug and Play

Enterprise Ready

Complete Solution

Key Features

Modern PAAS

Uses micro-services to enable fault tolerance.

Legacy Support

Easy parallel integration with legacy systems.

Enterprise API's & SDK

Fast and easy integration with the platform.

Ease of Customization

Update network size, consensus method and smart contract easily

Scalable Blockchain

Improved sharding method for scalable public blockchain

Monitoring Tools

Web app based development and monitoring tools

We Use

HYPERLEDGER

ethereum

Roadmap

Q1 2019

Use case implementation on platform

Q3 2019

ICO- Phase 2
API's for 5 different use cases

Q4 2018

Whitepaper v 0.1
Beta release of platform

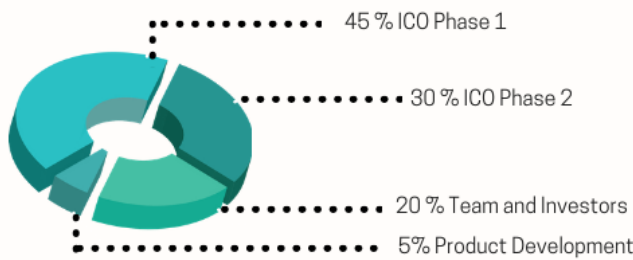

Q2 2019

ICO- Phase 1
Token use starts on the platform

Q4 2019

Inter Blockchain Communication Hub

Token Distribution
